Python fullstack

Python contents
Python Intro

- What is Python?
- Features of Python
- Python vs Other Languages
- Python Installation
- Python IDEs

Python Syntax

- Basic Syntax
- Indentation
- Comments
- Code Blocks
- Statements and Expressions

Python Comments

- Single-Line Comments
- Multi-Line Comments

Python Variables

- Variable Declaration
- Variable Types
- Variable Naming Conventions
- Global vs Local Variables

Python Data Types

- Strings
    - String Operations
    - String Methods
- Numbers
    - Integer
    - Float
    - Complex Numbers
- Booleans
- Lists
    - List Operations
    - List Methods
- Tuples
    - Tuple Operations
    - Tuple Methods
- Sets
    - Set Operations
    - Set Methods
- Dictionaries
    - Dictionary Operations
    - Dictionary Methods

Python Numbers

- Arithmetic Operations
- Comparison Operations
- Built-in Functions for Numbers

Python Casting

- Type Conversion
- Implicit vs Explicit Casting

Python Strings

- String Formatting
- String Methods
- String Manipulation

Python Booleans

- Boolean Logic
- Boolean Operations

Python Operators

- Arithmetic Operators
- Comparison Operators
- Logical Operators
- Assignment Operators
- Bitwise Operators

Python Lists

- Creating Lists
- Accessing List Elements
- List Methods
- List Comprehensions
- Nested Lists

Python Tuples

- Creating Tuples
- Accessing Tuple Elements
- Tuple Methods
- Tuple Packing and Unpacking

Python Sets

- Creating Sets
- Set Operations
- Set Methods

Python Dictionaries

- Creating Dictionaries
- Accessing Dictionary Values
- Dictionary Methods
- Nested Dictionaries

Python If...Else

- Conditional Statements
- Elif and Else
- Nested Conditions

Python While Loops

- Basic While Loop
- Break and Continue Statements
- Nested While Loops

Python For Loops

- Basic For Loop
- Looping Through Lists, Tuples, Sets, Dictionaries
- Iterating Over Strings
- Using the Range Function

Python Functions

- Defining Functions
- Function Arguments
- Return Values
- Scope of Variables
- Default Arguments
- Keyword Arguments
- Variable-Length Arguments

Python Lambda

- Lambda Functions
- Lambda with Map, Filter, and Reduce

Python Arrays

- Arrays vs Lists
- Array Operations
- Using the `array` Module

Python Classes/Objects

- Class Definition
- Object Instantiation
- Attributes and Methods
- Constructor
- Destructor

Python Inheritance

- Single Inheritance
- Multiple Inheritance
- Method Overriding
- Super Function

Python Iterators

- Creating Iterators
- Using Iterators
- Itertools Module

Python Polymorphism

- Method Overloading
- Method Overriding

Python Scope

- Local Scope
- Global Scope
- Nonlocal Keyword

Python Modules

- Importing Modules
- Creating Modules
- Module Search Path
- Standard Modules

Python Dates

- Working with Dates and Times
- Date and Time Formatting
- Time Duration

Python Math

- Mathematical Functions
- Math Module
- Random Module

Python JSON

- Parsing JSON
- Generating JSON
- Working with JSON Data

Python RegEx

- Regular Expressions Basics
- RegEx Patterns
- RegEx Functions

Python PIP

- Installing Packages
- Managing Packages
- Virtual Environments

Python Try...Except

- Error Handling
- Multiple Except Clauses
- Finally Clause
- Raising Exceptions

Python User Input

- Reading User Input
- Input Validation

Python String Formatting

- Old Style Formatting
- New Style Formatting
- f-Strings

File Handling

Python File Handling

- Opening Files
- Closing Files
- File Modes

Python Read Files

- Reading Text Files
- Reading Binary Files
- Reading Line by Line

Python Write/Create Files

- Writing to Files
- Appending to Files
- Creating New Files

Python Delete Files

- Deleting Files
- Handling File Exceptions
- Online Compilers
- Running Python Code

Django

Introduction to Django

- What is Django?
- Django Features
- Django vs Other Frameworks
- Setting Up Django

Django Installation

- Installing Django via pip
- Virtual Environments
- Verifying Installation

Django Project Setup

- Creating a Django Project
- Understanding Project Structure
- Running the Development Server

Django Apps

- Creating a Django App
- App Structure
- Registering an App

Django Models

- Defining Models
- Model Fields
- Model Methods
- Model Inheritance
- Using the Django ORM

Django Admin Interface

- Configuring Admin Interface
- Customizing Admin Models
- Creating Superuser

Django Views

- Function-Based Views
- Class-Based Views
- Generic Views
- View Decorators

Django Templates

- Template Basics
- Template Tags
- Template Filters
- Template Inheritance

Django URLs

- URL Patterns
- URL Routing
- Named URLs
- URL Converters

Django Forms

- Creating Forms
- Form Fields
- Form Validation
- Model Forms
